Notes:

(1) Further detailed information could be found in the common reporting format tables of the Party's greenhouse gas inventory, namely "Emission trends (CO₂)", "Emission trends (CH₄)", "Emission trends (N₂O)" and "Emission trends (HFCs, PFCs and SF₆)", which is included in an annex to this biennial report.

(2) 2011 is the latest reported inventory year.

(3) 1 kt CO₂ eq equals 1 Gg CO₂ eq.

Abbreviation: LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Includes net CO₂, CH₄ and N₂O from LULUCF.

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Fill in net emissions/removals as reported in CRF table Summary 1.A of the latest reported inventory year. For the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+).

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Enter actual emissions estimates. If only potential emissions estimates are available, these should be reported in this table and an indication for this be provided in the documentation box. Only in these rows are the emissions expressed as CO₂ equivalent emissions.

^d In accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual inventories", HFC and PFC emissions should be reported for each relevant chemical. However, if it is not possible to report values for each chemical (i.e. mixtures, confidential data, lack of disaggregation), this row could be used for reporting aggregate figures for HFCs and PFCs, respectively. Note that the unit used for this row is kt of CO₂ equivalent and that appropriate notation keys should be entered in the cells for the individual chemicals.)

Table 2(a)

DNK_BR2_v4.0

Description of quantified economy-wide emission reduction target: base year^a

<i>Party</i>	<i>Denmark</i>		
Base year /base period	1990		
Emission reduction target	% of base year/base period	% of 1990 ^b	
	20.00	20.00	
Period for reaching target	BY-2020		

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Optional.

Description of quantified economy-wide emission reduction target: gases and sectors covered^a

<i>Gases covered</i>		<i>Base year for each gas (year):</i>	
CO ₂		1990	
CH ₄		1990	
N ₂ O		1990	
HFCs		1990	
PFCs		1990	
SF ₆		1990	
NF ₃		NA	
Other Gases (specify)			
Sectors covered ^b	Energy	Yes	
	Transport ^f	Yes	
	Industrial processes ^g	Yes	
	Agriculture	Yes	
	LULUCF	No	
	Waste	Yes	
	Other Sectors (specify)		
	Aviation in the scope of the EU-ETS	Yes	

Abbreviations : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b More than one selection will be allowed. If Parties use sectors other than those indicated above, the explanation of how these sectors relate to the sectors defined by the IPCC should be provided.

^f Transport is reported as a subsector of the energy sector.

^g Industrial processes refer to the industrial processes and solvent and other product use sectors.

Description of quantified economy-wide emission reduction target: global warming potential values (GWP)^a

<i>Gases</i>	<i>GWP values^b</i>
CO ₂	4th AR
CH ₄	4th AR
N ₂ O	4th AR
HFCs	4th AR
PFCs	4th AR
SF ₆	4th AR
NF ₃	4th AR
Other Gases (specify)	

Abbreviations : GWP = global warming potential

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Please specify the reference for the GWP: Second Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) or the Fourth Assessment Report of the IPCC.

Description of quantified economy-wide emission reduction target: approach to counting emissions and removals from the LULUCF sector^a

Role of LULUCF	LULUCF in base year level and target	Excluded
	Contribution of LULUCF is calculated using	

Abbreviation : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: market-based mechanisms under the Convention^a

<i>Market-based mechanisms under the Convention</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>
CERs	NE
ERUs	NE
AAUs ⁱ	NE
Carry-over units ^j	NE
Other mechanism units under the Convention (specify) ^d	

Abbreviations : AAU = assigned amount unit, CER = certified emission reduction, ERU = emission reduction unit.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^d As indicated in paragraph 5(e) of the guidelines contained in annex I of decision 2/CP.17 .

ⁱ AAUs issued to or purchased by a Party.

^j Units carried over from the first to the second commitment periods of the Kyoto Protocol, as described in decision 13/CMP.1 and consistent with decision 1/CMP.8.

Description of quantified economy-wide emission reduction target: other market-based mechanisms^a

<i>Other market-based mechanisms (Specify)</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: any other information^{a,b}

In December 2009, the European Council reiterated the conditional offer of the EU to move to a 30% reduction by 2020 compared to 1990 levels as part of a global and comprehensive agreement for the period beyond 2012, provided that other developed countries commit themselves to comparable emission reductions and that developing countries contribute adequately according to their responsibilities and respective capabilities.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b This information could include information on the domestic legal status of the target or the total assigned amount of emission units for the period for reaching a target. Some of this information is presented in the narrative part of the biennial report.

Custom Footnotes

and Greenland are not included in the EU territory, the commitments of Denmark as a member of the EU do not apply to the Faroe Island and Greenland. Legally binding target trajectories for the period 2013-2020 are enshrined in both the EU ETS Directive (Directive 2003/87/EC and respective amendments) and the Effort Sharing Decision (Decision No 406/2009/EC). These legally binding trajectories not only result in a 20% GHG reduction in 2020 compared to 1990 but also define the EU's annual target pathway to reduce EU GHG emissions from 2013 to 2020. The Effort Sharing Decision sets annual national emission targets for all Member States for the period 2013-2020 for those sectors not covered by the EU emissions trading system (ETS), expressed as percentage changes

See footnote 1.

See footnote 1.

See footnote 1.

GWPs from AR4 as adopted in UNFCCC reporting guidelines for national GHG inventories of Annex I Parties and as adopted under the EU Monitoring Mechanism Regulation.

See footnote 5.

See footnote 5.

See footnote 5.

See footnote 5.

See footnote 5.

territories. â However, since 2012, flights to and from aerodromes from other countries have not been included in the EU ETS. This exclusion was taken in order to facilitate negotiation of a global agreement to address aviation emissions in the forum of the International Civil Aviation Organisation (ICAO). The EU has decided on a reduced scope in the 2013-2016 period (Regulation (EU) No 421/2014 of the European Parliament and of the Council of 16 April 2014). It should be noted that only CO₂ from aviation is included, and that it is only relevant to include these emissions reported by aviation entities on the level of EU total CO₂ emissions from aviation under the EU ETS as CO₂-emissions from aviation entities registered in the Danish quota register (based on fuel used by these entities). The 2020 Climate and Energy Package allows Certified Emission Reductions (CERs) and Emission Reduction Units (ERUs) to be used for compliance purposes, subject to a number of restrictions in terms of origin and type of project and up to an established limit. In addition, the legislation foresees the possible recognition of units from new market mechanisms. Under the EU ETS the limit does not exceed 50% of the required reduction below 2005 levels. In the sectors not covered by the ETS, annual use shall not exceed to 3% of each Member States' non-ETS greenhouse gas emissions in 2005. A limited number of Member States may use an additional 1%, from projects in LDCs or SIDS subject to conditions.

The use of these units under the ETS Directive and the Effort Sharing Decision is subject to the limits specified above which do not separate between CERs and ERUs, but include additional criteria for the use of CERs.

See footnote 13.

AAUs for the period 2013-2020 have not yet been determined. The EU expects to achieve its 20% target for the period 2013-2020 with the implementation of the ETS Directive and the ESD Decision in the non-ETS sectors which do not allow the use of AAUs from non-EU Parties.

The time-period of the Convention target is from 1990-2020, no carry-over units will be used to achieve the 2020 target.

There are general provisions in place in the EU legislation that allow for the use of such units provided that the necessary legal arrangements for the creation of such units have been put in place in the EU which is not the case at the point in time of the provision of this report.

Table 1
 Parameters and characteristics of the growth of microorganisms in the water supply infrastructure and distribution network

TABLE 1.1

No.	Name of the parameter	Unit	Method of measurement	Frequency of measurement	Location of measurement	Reference value	Description of the parameter	Reference value	Reference value		
									Min.	Max.	Avg.
1	Temperature	°C	Water	Continuous	Water supply network	10-15	The temperature of the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 10-15°C.	10	15	12.5	
2	pH		Water	Continuous	Water supply network	7-8.5	The pH value of the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 7-8.5.	7	8.5	7.75	
3	Dissolved oxygen	mg/l	Water	Continuous	Water supply network	7-8	The dissolved oxygen content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 7-8 mg/l.	7	8	7.5	
4	Total dissolved solids	mg/l	Water	Continuous	Water supply network	100-200	The total dissolved solids content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 100-200 mg/l.	100	200	150	
5	Hardness	mg/l	Water	Continuous	Water supply network	100-200	The hardness content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 100-200 mg/l.	100	200	150	
6	Chlorine	mg/l	Water	Continuous	Water supply network	0.2-0.5	The chlorine content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 0.2-0.5 mg/l.	0.2	0.5	0.35	
7	Free chlorine	mg/l	Water	Continuous	Water supply network	0.2-0.5	The free chlorine content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 0.2-0.5 mg/l.	0.2	0.5	0.35	
8	Total chlorine	mg/l	Water	Continuous	Water supply network	0.2-0.5	The total chlorine content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 0.2-0.5 mg/l.	0.2	0.5	0.35	
9	Residual chlorine	mg/l	Water	Continuous	Water supply network	0.2-0.5	The residual chlorine content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 0.2-0.5 mg/l.	0.2	0.5	0.35	
10	Free residual chlorine	mg/l	Water	Continuous	Water supply network	0.2-0.5	The free residual chlorine content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 0.2-0.5 mg/l.	0.2	0.5	0.35	
11	Total residual chlorine	mg/l	Water	Continuous	Water supply network	0.2-0.5	The total residual chlorine content in the water in the water supply network should be maintained at a level that ensures the growth of microorganisms. The reference value is 0.2-0.5 mg/l.	0.2	0.5	0.35	

1. The reference value is the average value of the parameter over the period of measurement.
 2. The reference value is the minimum value of the parameter over the period of measurement.
 3. The reference value is the maximum value of the parameter over the period of measurement.
 4. The reference value is the average value of the parameter over the period of measurement.
 5. The reference value is the minimum value of the parameter over the period of measurement.
 6. The reference value is the maximum value of the parameter over the period of measurement.
 7. The reference value is the average value of the parameter over the period of measurement.
 8. The reference value is the minimum value of the parameter over the period of measurement.
 9. The reference value is the maximum value of the parameter over the period of measurement.
 10. The reference value is the average value of the parameter over the period of measurement.
 11. The reference value is the minimum value of the parameter over the period of measurement.
 12. The reference value is the maximum value of the parameter over the period of measurement.

Table 4

DNK_BR2_v4.0

Reporting on progress^{a, b}

Year ^c	Total emissions excluding LULUCF	Contribution from LULUCF ^d	Quantity of units from market based mechanisms under the Convention		Quantity of units from other market based mechanisms	
	(kt CO ₂ eq)	(kt CO ₂ eq)	(number of units)	(kt CO ₂ eq)	(number of units)	(kt CO ₂ eq)
(1990)	71,006.48	NA	NA	NA	NA	NA
1990	71,006.48	NA	NA	NA	NA	NA
2010	64,845.23	NA	NA	NA	NA	NA
2011	59,872.27	NA	NA	NA	NA	NA
2012	55,095.28	NA	NA	NA	NA	NA
2013	57,057.24	NA	NA	NA		
2014	NA	NA	NA	NA		

Abbreviation : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For the base year, information reported on the emission reduction target shall include the following: (a) total GHG emissions, excluding emissions and removals from the LULUCF sector; (b) emissions and/or removals from the LULUCF sector based on the accounting approach applied taking into consideration any relevant decisions of the Conference of the Parties and the activities and/or land that will be accounted for; (c) total GHG emissions, including emissions and removals from the LULUCF sector. For each reported year, information reported on progress made towards the emission reduction targets shall include, in addition to the information noted in paragraphs 9(a–c) of the UNFCCC biennial reporting guidelines for developed country Parties, information on the use of units from market-based mechanisms.

^c Parties may add additional rows for years other than those specified below.

^d Information in this column should be consistent with the information reported in table 4(a)I or 4(a)II, as appropriate. The Parties for which all relevant information on the LULUCF contribution is reported in table 1 of this common tabular format can refer to table 1.

Custom Footnotes

GHG emissions (without LULUCF, without NF3 and without indirect CO₂ emissions) including CO₂ from international aviation. On guidance from the European Commission the latter ("inventory CO₂ from international aviation" based on fuel sold to aircrafts starting from Danish airports) is included in this table 4 as a proxy for CO₂ from international aviation activities reported by aviation entities registered in the Danish quota register ("entity CO₂ from international and domestic aviation" based on fuel used by Danish entities). The data without CO₂ from international aviation is in kt CO₂eq.: 69,268.08(1990)/ 62,440.63(2010)/ 57,397.41(2011)/ 52,598.91(2012)/ 54,583.81(2013). Data for 2014 are not available at the

Numbers for LULUCF are not reported because this sector is not included under the Convention target of the EU.

Progress in achieving the quantified economy-wide emission reduction targets – further information on mitigation actions relevant to the contribution of the land use, land-use change and forestry sector in 2013 ^{a,b}

	<i>Net GHG emissions/removals from LULUCF categories</i> ^c	<i>Base year/period or reference level value</i> ^d	<i>Contribution from LULUCF for reported year</i>	<i>Cumulative contribution from LULUCF</i> ^e	<i>Accounting approach</i> ^f
	<i>(kt CO₂ eq)</i>				
Total LULUCF					
A. Forest land					
1. Forest land remaining forest land					
2. Land converted to forest land					
3. Other ^g					
B. Cropland					
1. Cropland remaining cropland					
2. Land converted to cropland					
3. Other ^g					
C. Grassland					
1. Grassland remaining grassland					
2. Land converted to grassland

Harvested wood products					

Abbreviations: GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Parties that use the LULUCF approach that is based on table 1 do not need to complete this table, but should indicate the approach in table 2. Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^c For each category, enter the net emissions or removals reported in the most recent inventory submission for the corresponding inventory year. If a category differs from that used for the reporting under the Convention or its Kyoto Protocol, explain in the biennial report how the value was derived.

^d Enter one reference level or base year/period value for each category. Explain in the biennial report how these values have been calculated.

^e If applicable to the accounting approach chosen. Explain in this biennial report to which years or period the cumulative contribution refers to.

^f Label each accounting approach and indicate where additional information is provided within this biennial report explaining how it was implemented, including all relevant accounting parameters (i.e. natural disturbances, caps).

^g Specify what was used for the category "other". Explain in this biennial report how each was defined and how it relates to the categories used for reporting under the Convention or its Kyoto Protocol.

Custom Footnotes

Table 4(A)I: Not Applicable as LULUCF is excluded from the joint EU28 2020 target under the UNFCCC.

See footnote 1.

		<i>(kt CO₂ eq)</i>	NA	NA	
	<i>Other units^{d,e}</i>	<i>Units from market-based mechanisms under the Convention</i>	<i>(number of units)</i>		
			<i>(kt CO₂ eq)</i>		
<i>Units from other market-based mechanisms</i>		<i>(number of units)</i>			
		<i>(kt CO₂ eq)</i>			
<i>Total</i>		<i>(number of units)</i>	NA	NA	
		<i>(kt CO₂ eq)</i>	NA	NA	

Abbreviations : AAUs = assigned amount units, CERs = certified emission reductions, ERUs = emission reduction units, ICERs = long-term certified emission reductions, tCERs = temporary certified emission reductions.

Note: 2011 is the latest reporting year.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For each reported year, information reported on progress made towards the emission reduction target shall include, in addition to the information noted in paragraphs 9(a-c) of the reporting guidelines, on the use of units from market-based mechanisms.

^c Parties may include this information, as appropriate and if relevant to their target.

^d Units surrendered by that Party for that year that have not been previously surrendered by that or any other Party.

^e Additional rows for each market-based mechanism should be added, if applicable.

Custom Footnotes

Table 4(b): Not Applicable as the use of CERs and ERUs cannot be quantified at the time of the reporting. No "other market-based mechanisms" are in use.

See footnote 1.

Information on updated greenhouse gas projections under a ‘with measures’ scenario^a

	<i>GHG emissions and removals^b</i>							GHG emission projections	
	<i>(kt CO₂ eq)</i>							<i>(kt CO₂ eq)</i>	
	<i>Base year (1990)</i>	1990	1995	2000	2005	2010	2013	2020	2030

Abbreviations : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, at a minimum Parties shall report a ‘with measures’ scenario, and may report ‘without measures’ and ‘with additional measures’ scenarios. If a Party chooses to report ‘without measures’ and/or ‘with additional measures’ scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report ‘without measures’ or ‘with additional measures’ scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this biennial report. Where the sectoral breakdown differs from that reported in the GHG inventory Parties should explain in their biennial report how the inventory sectors relate to the sectors reported in this table.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors (i.e. cross-cutting), as appropriate.

^f Parties may choose to report total emissions with or without LULUCF, as appropriate.

Custom Footnotes

For all rows in this table: Denmark without Greenland and the Faroe Islands.

Abbreviations: ODA = official development assistance, OOF = other official flows.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.^b Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.^c Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".^d This refers to support to multilateral institutions that Parties cannot specify as climate-specific.^e Parties should explain in their biennial reports how they define funds as being climate-specific.^f Please specify.^g Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

New and Additional (cf. CTF note to Table 7): According to the reporting requirements, Annex II parties shall clarify how they have determined if resources are new and additional. When the terminology "new and additional" was used in Article 4.3 of the UNFCCC, the intent was to ensure that no development assistance funds would be diverted by Annex II developed country Parties to meet their obligations under the Convention. There is still not any agreement on a definition of new and additional. Denmark sees climate and development assistance as strongly interdependent and, as climate is mainstreamed in Danish development assistance, climate finance cannot be clearly separated from development finance altogether, except for the earmarked funds in the Climate Envelope.

Zambia /	11,300.00	2,000.00	Provided	ODA	Grant	Mitigation	Other (General environmental protection)	104.Zambia.806-104
Zambia /	344,600.00	61,400.00	Provided	ODA	Grant	Mitigation	Other (General environmental protection)	46.B.2.LUN

Abbreviations: ODA = official development assistance, OOF = other official flows; USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

Provision of public financial support: contribution through bilateral, regional and other channels in 2013^a

<i>Recipient country/ region/project/programme^b</i>	<i>Total amount</i>		<i>Status^c</i>	<i>Funding source^g</i>	<i>Financial instrument^g</i>	<i>Type of support^{g, h}</i>	<i>Sector^d</i>	<i>Additional information^e</i>
	<i>Climate-specific^f</i>							
	<i>Danish krone - DKK</i>	<i>USD</i>						

When the terminology “new and additional” was used in Article 4.3 of the UNFCCC, the intent was to ensure that no development assistance funds would be diverted by Annex II developed country Parties to meet their obligations under the Convention. There is still not any agreement on a definition of new and additional. Denmark sees climate and development assistance as strongly interdependent and, as climate is mainstreamed in Danish development assistance, climate finance cannot be clearly separated from development finance altogether, except for the earmarked funds in the Climate Envelope.

Abbreviations: ODA = official development assistance, OOF = other official flows; USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

Provision of public financial support: contribution through bilateral, regional and other channels in 2014^a

<i>Recipient country/ region/project/programme^b</i>	<i>Total amount</i>		<i>Status^c</i>	<i>Funding source^g</i>	<i>Financial instrument^g</i>	<i>Type of support^{g, h}</i>	<i>Sector^d</i>	<i>Additional information^e</i>
	<i>Climate-specific^f</i>							
	<i>Danish krone - DKK</i>	<i>USD</i>						

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

When the terminology "new and additional" was used in Article 4.3 of the UNFCCC, the intent was to ensure that no development assistance funds would be diverted by Annex II developed country Parties to meet their obligations under the Convention. There is still not any agreement on a definition of new and additional. Denmark sees climate and development assistance as strongly interdependent and, as climate is mainstreamed in Danish development assistance, climate finance cannot be clearly separated from development finance altogether, except for the earmarked funds in the Climate Envelope.

Mozambique	Mitigation and Adaptation	INA	Other (General environmental protection)	Public	Private and Public	Implemented	104.Mozambique.806-200-3

^a To be reported to the extent possible.^b The tables should include measures and activities since the last national communication or biennial report.^c Parties may report sectoral disaggregation, as appropriate.^d Additional information may include, for example, funding for technology development and transfer provided, a short description of the measure or activity and co-financing arrangements.**Custom Footnotes**

In this table examples of projects receiving bilateral support are shown. However, this list is not exhaustive since technology transfer is a component in most projects mentioned in Table 7(B). Unfortunately the methodologies for collection of support data does not allow for separate tracking of support for technology transfer. Information on measures and activities related to technology transfer and information on whether the activities undertaken are public, private or both is therefore not available (the information in the column on this should be read as "Private and/or public").INA: Information is Not Available.

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
China	Mitigation	Renewable Energy Programme: Programme Administration	Energy generation and supply, ODA, Implemented, 104.Kina.1.MFS.4-1-3.
Ghana	Mitigation	INA	Energy generation and supply, ODA, Implemented
Kenya	Multiple Areas	BSPSII/Component 3 - Innovation and piloting Green Energy	Business and other services, ODA, Implemented, 104.Kenya.809-200-3.
China	Mitigation	Renewable Energy Programme: Monitoring and Reviews	Energy generation and supply, ODA, Implemented, 104.Kina.1.MFS.4-1-5.
China	Mitigation	Renewable Energy Programme: Component 2 - innovative RE technologies	Energy generation and supply, ODA, Implemented, 104.Kina.1.MFS.4-1-2.
Mozambique	Multiple Areas	Environmental Sector Programme Support Phase II - Component 3	General environmental protection, ODA, Implemented, 104.Mozambique.806-200-3
Mozambique	Multiple Areas	Environmental Sector Programme Support Phase II - Component 2	General environmental protection, ODA, Implemented, 104.Mozambique.806-200-2
Kenya	Mitigation	Natural Resource Management Programme - Kenya - Component 3. Civil Society and Private Sector Management of Natural Resources	General environmental protection, ODA, Implemented, 104.Kenya.806-20-18
Mozambique	Multiple Areas	Environmental Sector Programme Support Phase II - Component 1	General environmental protection, ODA, Implemented, 104.Mozambique.806-200-1
China	Mitigation	Renewable Energy Programme: Component 1 - institutional development	Energy generation and supply, ODA, Implemented, 104.Kina.1.MFS.4-1-1.
Kenya	Mitigation	Natural Resource Management Programme - Kenya - Component 1. Environmental Policies and Governance	General environmental protection, ODA, Implemented, 104.Kenya.806-20-16
Kenya	Mitigation	Natural Resource Management Programme - Kenya - Component 2. Support to Arid Lands Resource Management	General environmental protection, ODA, Implemented, 104.Kenya.806-20-17
China	Mitigation	Renewable Energy Programme: International Programme Advisor	Energy generation and supply, ODA, Implemented, 104.Kina.1.MFS.4-1-4.

^a To be reported to the extent possible.

^b Each Party included in Annex II to the Convention shall provide information, to the extent possible, on how it has provided capacity-building support that responds to the existing and emerging capacity-building needs identified by Parties not included in Annex I to the Convention in the areas of mitigation, adaptation and technology development and transfer.

^c Additional information may be provided on, for example, the measure or activity and co-financing arrangements.

Custom Footnotes

In this table projects receiving bilateral support in 2014 are shown since capacity building is a component in most projects. Unfortunately the methodologies for collection of support data does not allow for separate tracking of support for capacity building. A detailed description of the capacity building element for each project is therefore not available. INA: Information is Not Available.
